NEW EPA LEAD REGULATIONS

WHO DOES THIS EFFECT?

- Any person/company performing a remodeling project on property built prior to 1978.
- This includes siding and ANY WINDOW REPLACEMENT.

HOW DO I COMPLY?

- Your company MUST register with the EPA – go to www.epa.gov/lead
- Your company must have ONE or more CERTIFIED RENOVATORS assigned to jobs where lead based paint is disturbed.
- Lead Abatement Certified staff are still required to take 4 hours of additional training.
- Every employee on the job site must be trained.
- All firms must distribute the EPA's Renovate Right lead hazard information pamphlet before starting renovation work.

HOW MUCH DOES THIS COST?

- Company Registration with the EPA – approximately \$300.00 (every 5 yrs).
- Certified Renovator Class – up to \$280.00 per person (every 5 yrs).

YOU'RE KIDDING RIGHT?

NO, we're not kidding! All firms must be certified. Renovators must be trained and Lead-safe practices must be followed. However, to help out our customers, Tri-State Wholesale and the Lead Consortium (www.environmentaltraining.com) are offering you a discounted rate of \$175.00 per person per class. This is a 30% saving over the regular cost of this training. We need to have groups of 5 or more to get this rate. There are classes in February and March. Call 513.381.1231 or e-mail sales@tri-statewholesale.com for more information.
