the Rainy Days of Spring,,*

Leaf Relief

Gutters

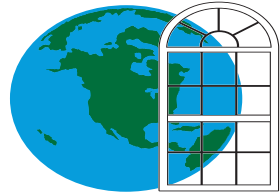

Windows

*The weather is stormy,
**Rain is falling, your
Rain Gutters are
channeling water from
the roof to the ground.
Rain Gutters perform an
important function
preventing Rain Water
from seeping into the roof
& home; they also protect
the building's foundation
from damage. Years of
neglect or simple old age
may have left the Rain
Gutter leaking &
sagging, or looking
outdated with water
damage, even staining
the soffits. Gutter guards
(**Leaf Relief**) allow
water to flow into the
gutter while preventing
leaves or other debris
from collecting within the
gutter trough.***
