Honey, PA Limestone, Shanondoah,
Easton & Antigo**

Tri-State is GIVING AWAY FREE Low E & ARGON!

(any window 101ui or less)

(so whats argon?)

Argon is a safe odorless, colorless, non-toxic, non-flammable gas that is commonly used in place of air between the glass panes of an insulated Low E glass unit. Argon's heat conductivity is lower than that of air. And thus it is better insulator and contributes to a lower U-factor. Argon is not an effective solar performer by itself: that is why it is only used on conjunction with Low E insulated glass
